An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Coe Bloomberg on December 5, 2005.

The application has been amended as follows:

Claims 1-29, 33, 34, 40-45, 47-51, 53, and 55-56 have been canceled as being drawn to an embodiment that was non-elected with traverse.

In claim 52, line 1, the word "(withdrawn)" has been changed to – (original) --.

Claims 52 was amended because it contained the same allowable features of claim 54 and hence was also allowable.

The following is an examiner's statement of reasons for allowance: In reviewing the rejection of record, it is the examiner's position that none of the art taught the step of solving for the constant³ by substituting with the first and second signal outputs into the formula, with a known concentration, in combination with the remaining claim features. While this may be a known manner of solving for a constant, there is no motivation to combine such a technique with the other three references to arrive at the claimed invention. Therefore, it is the examiner's position that claims 52 and 54 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
